## HUMANITY VS BEING HUMAN

Light never shines but reflects so that everything in this entire universe could shine! Our eyes are capturing, just because of light and its phenomenon. So, take a pause from reading this passage and think for a blink, "what will happen if light stop reflecting?"

Strange, right? We will not be able to see if light stops reflecting and what about if it starts shining? You might think say "Dormant are you crazy? Light never shines!"

You are right!

Same do I believe that our life should be lived on principle that, light inside us should be used to spark the whole instead of brightening oneself. There is a huge difference between being human and following the path of humanity. Humanity teaches us not just, what being human is but also to respect the living beings, around us. Life is a gift from God, whether it is of a microscopic organism or the Blue Whale or Homo sapiens, everyone should be treated equally!

But in this era, greed has taken over humanity and the Dove inside us has died and unleashed the Tyger, whose eyes are burning fire (The Tyger; William Blake). We human beings are so blind that we could not see that we are blood bathing with the dreams of luxury and lavish lifestyle! We are stepping upon the skeleton of billions of creatures that were created by the light of Big Bang to nourish a green planet among trillions of dead rocks, floating in endless universe.

In Avengers' End game, Thanos, the super villain of the movie swipes half of the population, and in a second took down the only termite who are eating down our baby earth as a pile of wood. Does humanity really teach us to destroy our own home? Green house emission, ozone layer depletion, global warming, killing of billions of aquatics for proving that luxury and life can be bought on cost of money, which too is made by slaughtering millions of trees.

Man is the only living being on the earth that is responsible for the destruction of the environment. With every passing day, one of the revolutionary invention "plastic" is making the mother nature from the deepest Mariana Trench to the highest our eye can catch, everything, is now polluted.

In a day we see millions of times our mother nature dies and trying to nourish back and repair the damage we do!

How can this come to an end?

How can humanity be alive?

How can the grass climb the sky?

How can the soil speak?

How can the bird Sing?

How can the mother nature come back to life?

The answer to the question is hidden in the question itself! This can only be achieved when we start travelling back to past as we have travelled to the present. The only way to make sure that we see the future is by looking at past and correcting the mistake we did by over exploiting the resource we got as gift.

By replacing barren land with green and moving away from plastic and by looking towards green energy.

Can this be Done?

How much will it cost?

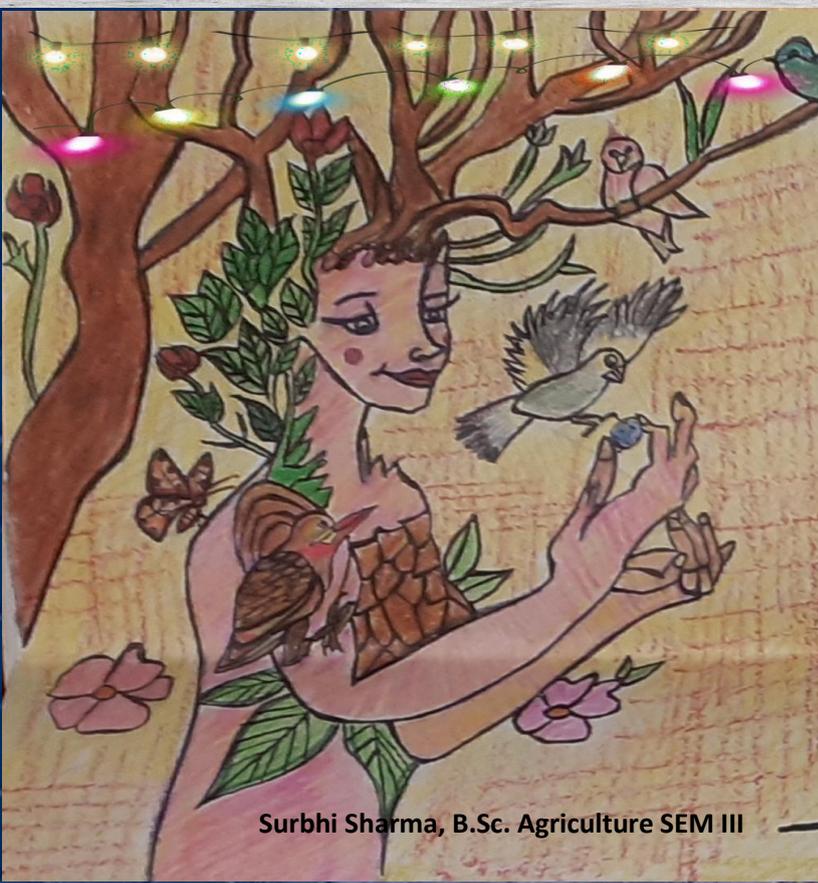

The answer is simple, if humans can use their energy to create nuclear war heads that can destroy the whole planet, it will take only 1% of that effort made together to save our beautiful planet from dying! Today space agencies are working day and night to discover traces of water and life form in the undiscovered Space. It's my request to all of them, life is like a dormant seed, please use half of that effort in saving and restoring life form on this dying planet.

It only takes proper care, sunlight and moisture for a dormant seed to grow into a fruit bearing tree! The same is with our Mother Nature, our life core, she is dying, she is decaying all she need is Humanity!

At RNB Global University , we provide opportunity to our student to get their work publish in monthly edition of Rnb Times . Students can send their work on official mail id of I&B Forum ( [ibforum@rnbglobal.edu.in](mailto:ibforum@rnbglobal.edu.in) )

## SUSTAINABLE DEVELOPMENT

Indians have always believed in a growth where everyone flourishes and not just a single person or a cluster of related people. This concept is well known even today, i.e., Sustainable Development Goals.

The United Nations have given 17 Targets to all of the Nations under it, which we are supposed to complete till 2030. Now, what is the sustainable development? What are the goals which we can try? And how will it help us and of course, WE, the future generation!

### SUSTAINABLE DEVELOPMENT –

It is a development that meets the need of present without compromising the ability of future generations to meet their own needs. Since, it is sustainable, we can think of all, unlike, the Corona Code! Another, beautiful thing about, Humans is – that we have to think of the ecosystem which has been there for long-long time and is still growing, amongst this polluted environment. Humanity has maintained the top position.

### THE GOALS –

There is total 17 goals, which every nation till 2030, can try to complete. These goals are very much interlinked to each other, just like the demand and supply of a product. So, the goals involve a lot of EDUCATION, which is directly related to us, the students and the upcoming future generation who will graduate in a decade, and who will be the taxpayers very soon! We need to boast ourselves and should not go back on our word.

The targets include, No poverty; zero hunger; Good Health and well-being; Quality Education; Gender Equality (which is on papers and not in reality); Clean water and sanitation; Affordable and Clean Energy; Decent work and economic growth; Industry, innovation and infrastructure; Sustainable cities and communities; Climate Action; Life below Water; Life and land; etc.

So, by merely looking at all of these we are reminded of the days where we were studying them, and the best possible way to overcome all the harm and degradation of environment could be resolved with the settlement between the present age and the upcoming age.

### HOW IT WILL HELP US?

The best possible answer to it could be – “It would satisfy, all, the already satisfied people and the greedy ones as well, as it is not for others, it is for our own Good”! And it will look for the overall development of the nation and the Globe! As, what a miserable life it would be without all the Green and Blue! Thank you for reading, a small step, towards sustainable usage could be a big help for the development.

## Embrace ur flaws !

It's Okay to Be Imperfect!

“Embrace the glorious mess that you are” – Elizabeth Gilbert.

Yes, you have read that right, it's completely normal to be imperfect. Life is not perfect, and this a truth that we all face at a very early age. Why do we've standards set when the world that surrounds us imperfect? Famine, drought, and all other calamities are a part of the world that we live in; the people around us aren't perfect either – greed, selfishness, and such similar feelings prevail in the hearts and minds of people, then why is it not normal to be imperfect?

Imperfections are flaws or are our personal qualities that we think make us less than. You laugh too loud or are too quiet? Or weigh more than you wish to or are too skinny? Or perhaps you feel shy in a social situation? Think about it, are these serious issues? It's silly, but these little things make us think that we are imperfect! And what do we do when we feel that we have certain imperfections? We try to hide them and pretend that they never existed. What we don't realize is that in doing so we create a fake personality of ourselves! And in my view, a fake personality is more awful than certain imperfections. But these 'imperfections' aren't bad after all. The flaws, rough edges, broken rules, and counter-intuitive choices are what makes our work unique, effective, and memorable. The imperfections are what attracts others to our creations and what makes them stand out. Perfection is like a rulebook that is made by society; if everyone becomes perfect, wouldn't all of us be identical? It is the imperfections that make us unique. Everything from being short-tempered to being overemotional, having a crooked smile or a speech impediment, these are the things that make us different, and this is what makes us beautiful!

People tend to push themselves to their limits just to be perfect or say to fit into the standards set by society, and this does not do much good to them, as most times, people end up unhappy. And being unhappy is not what anybody wants! It is important for us to learn to embrace our true selves and accept who we really are! Remember, that you do not need to 'fit-in' and that you are beautiful the way you are!

“Sometimes we strive so hard for perfection that we forget that imperfection is happiness.”—Karen Nave.

## CONSUMER PROTECTION ACT

The Consumer Protection Act, implemented in 1986, gives easy and fast compensation to consumer grievances. It safeguards and encourages consumers to speak against insufficiency and flaws in goods and services. If traders and manufacturers practice any illegal trade, this act protects their rights as a consumer. The primary motivation of this forum is to bestow aid to both the parties and eliminate lengthy lawsuits.

Some of its features are:

- i. This Act is applicable on all the products and services, until or unless any product or service is especially debarred out of the scope of this Act by the Central Government. This Act is applicable to all the areas whether private, public or cooperative.
- ii. Many Acts have been passed for the help of consumers.
- iii. Consumers enjoy the benefits of these Acts but if a consumer wishes the Consumer Protection Act can provide extra help. As a result, the nature of provisions of this Act is compensating for the loss or providing extra help.
- iv. The consumer is totally free to enjoy the benefits provided in the Act.
- v. This Act provides many rights to consumers.
- vi. These rights are related to safety, information, choice, representation, redressal, education etc. This Act provides safety to consumers regarding defective products, dissatisfactory services, and unfair trade practices. So under the purview of this Act, there is a provision to ban all those activities which can cause a risk for the consumer. Consumer courts have been established so that consumers can enjoy their rights.
- vii. This Act presents a three- tier grievances redressal machinery: At District Level-District Forum; At State Level -State Commission; At National Level – National Commission.

### KNOW YOUR RIGHTS:

Those who cannot afford a lawyer, free legal aid from the government shall be provided to precede their case.

**-Legal Service Authorities Act, 1987.**

### LEGAL MAXIMS:

**Actus curiae neminem gravabit** – An Act of the Court shall prejudice no man.

Assentio mentium- the meeting of minds

## LANDMARK JUDGEMENTS

### Daughter's right to property in HUF

#### LANDMARK JUDGEMENTS

#### Daughter's right to property in HUF

A landmark decision supporting women's rights, the Supreme court ruled that that daughter has equal rights in her father's property. The three-judge bench held that daughters and sons have equal coparcenary rights in a Hindu undivided family (HUF). In its decision, the Supreme Court clarified two points:

Fathers need not have been alive when the 2005 amendment to the Hindu Succession Act of 1956.

Coparcenary rights are acquired by the daughter.

#### Allowing Cryptocurrency, quashing RBI restriction

The Supreme court ruled that the RBI curb on cryptocurrency and the use of bitcoins from 2018 was illegal. This move allowed many Indians to jump on and cash in on Bitcoin's stellar rally this year.

#### No fundamental right to reservation

The Supreme court ruled that there is no fundamental right to claim reservation in public jobs. It added that no court could ask a state government to provide reservation and explained that the constitutional mandate on providing reservation is within the absolute discretion of a state government to decide, however, there is no obligation on the states to mandatorily do so
