BUSINESS LAB

RNB GLOBAL UNIVERSITY

RNB Global City, Ganganagar Road,
Bikaner, Rajasthan 334601

1. BUSINESS LABS

Today's business world is global and high tech, so it is vital for students and faculty to have access to state-of-the-art technology hardware and software to learn how businesses stay connected. The University itself provides a wide array of technology equipment and labs. Students and faculty have access to wireless internet, configurable classrooms, and break out rooms equipped with large screens and HDMI connections for group study and presentations. As the university, at the forefront of knowledge enrichment and dissemination of knowledge, catering to the academic needs of **students**, the business lab has put in place enormous knowledge resources. Well- equipped and state-of-the-art lab with updated technology is one of strongest assets of the University.

The Business Labs include general-access by serving the needs of students and faculty. Business lab in the network is operated. However, every student currently enrolled in the university may access the Business Labs.
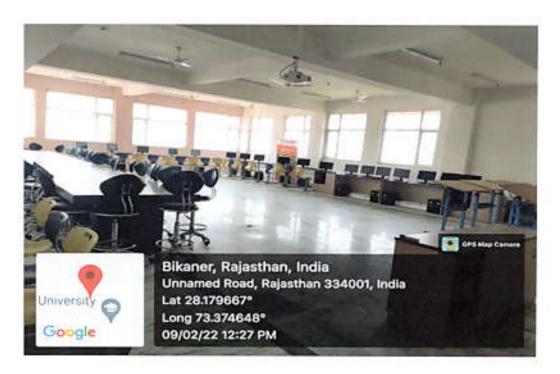

In addition to meeting the general academic needs of all students, each lab provides discipline-specific software and resources to fulfill the unique academic requirements of the students. The Student Business Labs provide innovative technologies and services that attract, inspire and support current and future University students as they pursue their academic and personal goals. This is a great environment for teaching business applications, and the lab can accommodate students.

Additionally, the labs offer a wide range of services and resources that support innovation, creative cross-discipline endeavors, and academic development. Practical sessions provide authentic and current knowledge to every budding entrepreneur. The University takes pride at its labs that harbors favorable nurturing ground for personal growth, research and social progress.
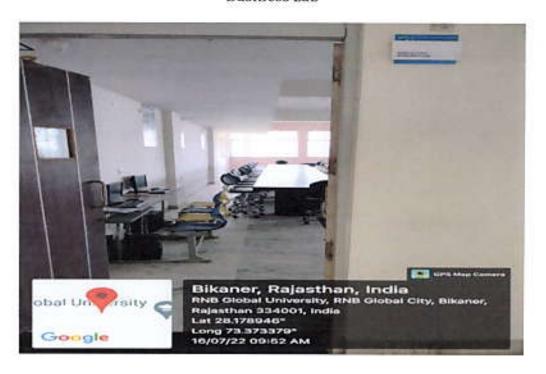

It is the mission of the Business labs to support the university's mission and strategic plans by providing the following:

- Open access to high quality, technologically-advanced environments in which students may pursue their academic endeavors
- State-of-the-art environments that support students in their personal and professional goals and assist them in preparing for the workforce of the future
- Technology that promotes the university's commitment to academics, research, community engagement, and creative activities
- Professional and friendly customer service assistants who enhance the university's ability to attract and retain qualified students
- Computer lab environments that support increased leadership in professional service and outreach activities that improve the quality of life in the North Texas area
