The Cambridge English Placement Test

The fast, accurate, reliable way to place your students on English language courses.

The *Cambridge English Placement Test* is a fast, accurate online test for centres and institutions. You can use it for:

- **placing students on English language courses** - find out what level of English ability students have, which course is right for them, and which Cambridge English exam they should take
- **General admissions** - find out if students need to go on a pre-sessional course or in-sessional language improvement course.

The test is a comprehensive, international assessment of English ability that covers all the key language-learning skills. Results are mapped to the Common European Framework of Reference for Languages (CEFR) – the international standard for describing language ability.

Why use the Cambridge English Placement Test?

Fast

The test takes around 30 minutes and is available on demand. Results are instant, so you can make quick decisions about which English language and exam preparation classes to place your students in.

Reliable

The Cambridge English Placement Test has been developed by Cambridge English Language Assessment, part of the University of Cambridge. It is supported by a dedicated research programme to make sure it is accurate, fair, valid and reliable.

Flexible

The Cambridge English Placement Test is easy to set up and can be taken on demand – students don't need to go to a dedicated testing centre at a specific date and time. The test covers all the key language-learning skills, which can be assessed singly or in combination.

Easy to manage

Tests are easy to set up and manage, thanks to a dedicated administration site. You can book and offer tests to students at any time, and view and print results from the site.

International

the Cambridge English Placement Test features a wide variety of accents and texts from a range of English-speaking countries.

Suitable for all students

you can use the same adaptive test for all your students. Based on their responses, the test becomes progressively easier or more difficult, so their level of English can be identified and tested.

Lots of help for test-takers

Students can take an online tutorial to familiarise themselves with the test in advance. During the test, to help students plan their work, there is on-screen help and a progress bar. If there is

a problem with internet connection, there's no need to start again – the student can pick up the test where they left off.

Instant results you can trust

Test results are instant, so you can make quick decisions about which classes and courses are most suitable for your students.

Test Results

Results are presented in a clear, easy-to-understand report, which can be produced for one student or for a group. You can choose whether to show students their results at the end of the test.

For each student, you'll see:

- a score between 1 and 100
- the corresponding CEFR level
- information on which Cambridge English exams may suit them.

Score	CEFR level
90–100	C2 (Mastery)
