Introduction

"How do I begin?" When you're thinking about a job in technology, that's a natural thing to ask. Is it necessary to obtain a technical certification? Do you want to learn a programming language? Because the technology profession is so extensive, with multiple job options ranging from database administrator to network engineer, you'll get a seemingly unlimited array of replies.

For individuals considering a career in technology, it's advisable to resist the urge to enroll in a potentially costly, time-consuming training programme unless you're certain it's the correct curriculum and career path for you. Instead, acquire a sense of the technological employment market and what you're likely to find gratifying by selecting and choosing from this list of 10 mix-and-match actions.

Significance of Guest Lecture

Techies working in the industry's trenches can provide lots of guidance to those just getting started. They can also serve as mentors to assist you as you embark on a tech career. Mr. Bahadur, provided guidance and proved to be an mentor for students to answer their questions and solve their relatable queries.

Objectives of Guest Lecture

1. To enhance the knowledge of the students.
2. To clarify the doubts of the students.
3. To assist students to identify their career paths as techies in US.

Insight on Workshop

Mr. Bahadur, spoke about what you'll need to acquire a career in tech differ by firm, but if you can demonstrate that you have relevant talents, you'll have a better chance. While certain professions in the area are more solitary, you may also be required to work in a group, engage with programme end-users, and work irregular hours. Here are some soft talents you should work on and include in your CV and job interview:

- Communication
- Organization
- Passion
- Resourcefulness
- Time-management
- Adaptability
- Problem-solving
- Collaboration

He also discussed to get a tech job like, find out everything you can about the technology business, because technology is such a specialized profession, you may set yourself apart from other applicants by knowing more about it. Consider subscribing to industry blogs, joining industry-specific organizations that offer training to members, or listening to a podcast hosted by a well-known industry expert.

Finished freelancing jobs, students should be able to construct your portfolio and have actual experience to present a hiring manager if you sign up for freelancing assignments with customers.

A Report on Entrepreneurship lecture - Mr. Faisal Nafees, AGM, Narendra Bhawan

Feb 22, 2017

Mr. Faisal Nafees, a young entrepreneur delivered a special lecture on entrepreneurship to the students of BBA-IV and B.Com-IV on 22 Feb, 2017 in Room No 107 of Academic Block of RNBGU. Students participated enthusiastically in the interactive session of the lecture which lasted for over one hour. Mr. Nafees delved deep on becoming an entrepreneur and the qualities and characteristics of an entrepreneur. He emphasized the need and importance of career orientation during the studentship in the University. Dividing the life into various faces, he said the span of a person from 20 years - 30 years is golden period for making his/her career without thinking of saving money after joining any job later. He said a comparatively small company, even with small pay package is better than a big company because in small company one can learn many things and multitasking whereas in big companies the scope is very less. Between 30 years - 40 years of age one should join good company and learn leadership qualities and after that one should go for his own enterprise. He viewed that starting a new business at this mature age is better than continuing in any service of whatever pay packages.

Citing many examples from his personal life and also of various successful entrepreneurs, he said that students must chase their passion during the college/ University days but at the same time they must secure good marks because it is the degrees and certificates that reflect your achievements during the youth age. He explained various ways of learning as well as marketing his own image and the image of his new venture. He warned that during the service bondage with organization is necessary but more important thing is the personal development in terms of experience, pay package and image.

Many students raised questions and queries after the lecture was concluded. He pacified all the queries of students. His style of presentation was very pleasant and attractive. Speaking extempore he was center of eye balls for all the students, sometimes making them laugh by his comments.

Dr. Nitin Pathak was the coordinator of the special lecture while Dr. Chattar Singh presided over the interactive session. The lecture was concluded with the vote thanks. Students were very much satisfied with this interactive lecture.

Report on
Session on interview techniques & career planning

Date: 11th February 2017

Venue: Seminar Hall

Time: 09:15 pm to 10:15 pm

Audience: MBA II

Speaker of the event: Mr. Pankaj kr. Poddar,
AGM HR& IR, AVI-OIL INDIA P LTD

Signature of faculty

Signature of Dean

Introduction

A definition of the word "interview" was given before the session began. Additionally, Mr. Sharma covered the procedure for getting ready for an interview in great detail. He primarily focused on two aspects that candidates should keep in mind when preparing for interviews: that the interview is a two-way street (you are being evaluated by the interviewer, and they are being evaluated by the company), and that the interview is a two-way street (the interviewer evaluating you and you evaluating the organization). Participation in the interview should go beyond only responding to the questions.

He continued by discussing how to get ready for a pre-interview after that. He added that one must first have a thorough understanding of one's capabilities and priorities before conducting an interview. He advised students to go to an interview after doing comprehensive research on the job.

Significance of Workshop

The session focused on the importance of career planning in the life of the students. Speaker shared relevant insights for facing the interview & -In the workshop students will be informed about, important tools for doing job analyses and generating and writing job descriptions and profiles. You'll get the chance to try out several ideas and see what works best for you. You'll have access to a variety of tools and strategies, as well as information on current trends and best-practice developments.

Objectives of Workshop

1. To enhance the knowledge of the students.
2. Identifying the opportunities in the respective field.
3. To provide a practical exposure to the students about the actual working procedures.

Insight on Workshop

Provide strategies and professional abilities for job analysis and role knowledge, while ensuring that there are no organizational gaps or overlaps, and successfully apply one of the fundamental basic building blocks for best-practice human resource management. Learn how to design concise job descriptions and key accountability statements that convey to employees what is expected of them and support your performance management process to improve business performance and employee effectiveness.

The guest speaker discussed about the understanding to how to align accountabilities with performance management and goal-setting, and get to understand the main approaches for setting objectives of KPIs and OKRs and MSCs.
