## Introduction

Dr. Jacob Joseph, Associate Professor, School of Business and Management delivered the lecture on empathy and active listening which is in current scenario is very important concern for the students as part from hard working everyone need to have emotional intelligence too.

## Significance of session

Empathic listening is the practice of being attentive and responsive to others' input during conversation. Listening empathically entails making an emotional connection with the other person and finding similarities between their experience and your own so you can give a more heartfelt response.

## Objectives of session

1. Spread awareness among the students about active listening.
2. Ensuring to educate about discipline in life.

## Insight on session

The guest speaker Dr. Jacob Joseph, initially explained what is objective listening is to go beyond empathy and measure meaning and feelings against some objective reality & about active listening serves the purpose of earning the trust of others and helping you to understand their situations. Active listening comprises both a desire to comprehend as well as to offer support and empathy to the speaker

As he spoke about empathic listening is a structured listening and questioning technique that allows you to develop and enhance relationships with a stronger understanding of what is being conveyed, both intellectually and emotionally.

Dr. Garg wound up the lecture by explaining listening has always been an essential, yet underrated, workplace skill. It's something that leaders often spend little time thinking about, even less actively cultivating. As we head towards a new kind of hybrid workplace, it's imperative that leaders start not only listening, but listening well. Listening to what people are experiencing, to what they need, their aspirations, and their concerns. Those are going to be moving targets. Leaders will need to hone their virtual interactions as well as brushing off their face-to-face skills in the hybrid workplace.

Great listening is a central part of a broader human skillset including emotional awareness, empathy and compassion. That skillset is vital for safeguarding wellbeing, fostering engagement, and building productivity in the post-pandemic workplace. It's not a skillset many people have by default.

At the end he was thanked on behalf of the senior management for having spared his time to be with us.
