Examination System over ERP

Examination Process Flow

The examination process can be used to manage both regular and backlog examinations. Subject Selection Rules can be applied at the point of registration/ enrolment to the semester/session, and similarly exam eligibility rules can be applied prior to examinations based on the criteria for the required examination. This also works as a screening mechanism and only students meeting all required criteria, such as attendance, internal marks, assignments, etc. are permitted to appear for the main examination for the level/program.

Grading Process Flow

Configure the Exam on LMS

- Create Exam Tree
- Create Examination setup Master for Exam and Subject
- Then Map structure as given below
- Capture the score
