

Journal Finder Tools

Software

Prof Dipali Gupta RNB Global University, Bikaner

Learning Outcomes

After attending this lecture the learner will be able to;

- Enlist various Journal Finder Tools
- Apply filters for the selection best suited journal
- Select the most suitable journal for publication

Significance

• Journal Finder helps you find journals that could be best suited for publishing your scientific article.

Facts to Check

Facts to deal with...

- Name of the publisher. / Can we trust the journal?
- Does the journal publish in the field of your interest
- What are its editorial policy and editorial board
- Does they charge APC
- Whether this journal is indexed in any services that we use
- Check the website

Jane (Journal/ Author Name Estimator)

https://jane.biosemantics.org/

insert your title and/or abstract here: (or, click <u>here</u> to search using keywords)						
Scramble Clear Show extra options						
Find journals Find authors Find articles						

Welcome to Jane

Have you recently written a paper, but you're not sure to which journal you should submit it? Or maybe you want to find relevant articles to cite in your paper? Or are you an editor, and do you need to find reviewers for a particular paper? Jane can help!

Just enter the title and/or abstract of the paper in the box, and click on 'Find journals', 'Find authors' or 'Find Articles'. Jane will then compare your document to millions of documents in *PubMed* to find the best matching journals, authors or articles.

Keyword search

Instead of using a title or abstract, you can also search using a keyword search, similar to popular web search engines. Click here to search using keywords.

Beware of predatory journals

JANE relies on the data in PubMed, which can contain papers from predatory journals, and therefore these journals can appear in JANE's results. To help identify high-quality journals, JANE now tags journals that are currently indexed in MEDLINE, and open access journals approved by the Directory of Open Access Journals (DOAJ).

Additional information about Jane

SPRINGER NATURE

Find a journal

Looking for a place to publish? With over 3000 journals, we cover the full range of research disciplines.

Although we no longer suggest journals based on your manuscript, you can:

- browse our <u>A-Z list of journals</u> from Springer and BMC
- search by keyword across all Springer Nature journals

Web of Science Master List

• https://mjl.clarivate.com/home

Login

Browse, search, and explore journals indexed in the Web of Science

The Master Journal List is an invaluable tool to help you to find the right journal for your needs across multiple indices hosted on the Web of Science platform. Spanning all disciplines and regions, Web of Science Core Collection is at the heart of the Web of Science platform. Curated with care by an expert team of in-house editors, Web of Science Core Collection includes only journals that demonstrate high levels of editorial rigor and best practice. As well as the Web of Science Core Collection, you can search across the following specialty collections:

Biological Abstracts, BIOSIS Previews, Zoological Record, and Current Contents Connect, as well as the Chemical Information products.

Search Journal, ISSN or title word...

Search Journals

Already have a manuscript?

Find relevant, reputable journals for potential publication of your research based on an analysis of tens of millions of citation connections in *Web of Science Core Collection* using Manuscript Matcher.

Journal Finder

Whatever stage of writing you're at, our Journal Finder can help you decide the best place for your research. Enter or paste your title, abstract, keywords, or part of your draft below, and the Finder will suggest the most suitable journals. It's powered by the latest language processing technology.

Enter or paste your title, abstract, keywords, or an excerpt from your paper (max 1024 characters).
