Detailed Program

Bachelor of Computer Applications (BCA)

Semester-VII (2024-2028)

DOC202406220010

RNB GLOBAL UNIVERSITY

RNB Global City, Ganganagar Road, Bikaner, Rajasthan 334601

OVERVIEW

RNB Global University follows Semester System along with Choice Based Credit System as per latest guidelines of University Grants Commission (UGC). Accordingly, each academic year is divided into two semesters, **Odd (July-December) and Even (January-June).** Also, the university follows a system of continuous evaluation along with regular updating in course curricula and teaching pedagogy.

The curriculum for BCA Program for (July-December) Odd Semester, 2027 along with examination pattern is as follows:

Course Scheme

Semester -VII

| S. No. | Course Code | Course Category | Course Name | L | T | P | Credits |
|-----------|-------------|-----------------------|----------------------------------------------------------------------------|----|---|----|---------|
| 1. | BCAC14400 | DSC 20 | Internet of Things (IOT) | 3 | 1 | 0 | 4 |
| 2. | | DSE 5 / GE 5 | One from the Pool of DSE Courses / One from the pool of General electives | 3 | 1 | 0 | 4 |
| 3. | | DSE 6 / GE 6 | One from the Pool of DSE Courses / One from the pool of General electives | 3 | 1 | 0 | 4 |
| 4. | | DSE | One from the Pool of DSE Courses | 3 | 1 | 0 | 4 |
| 5. | DAPE99449 | Research Project-1 | Academic Project / Entrepreneurship | 0 | 0 | 12 | 6 |
| 6. | WHNN99000 | | Workshops & Seminars/ Human Values & Social Service/NCC/NSS | - | - | 1 | 1 |
| | | | Total | 12 | 4 | 12 | 23 |

DSC – Discipline specific Course

DSE – Discipline Specific Elective

SEC - Skill Enhancement Course

VAC – Value addition course

GE - General Elective

Discipline Specific Elective (DSE)

| S.No | Course Code | Course Name | L | T | P | Credits |
|------|-------------|----------------------------------|---|---|---|---------|
| 1. | BCAE14008 | Cyber laws | 3 | 1 | 0 | 4 |
| 2. | BCAE14009 | Advance development technologies | 3 | 1 | 0 | 4 |
| 3. | BCAE14010 | Intelligent System | 3 | 1 | 0 | 4 |

General Elective Courses (GE)

| S.No | Course Code | Course Name | L | T | P | Credits |
|------|--------------------|-----------------------------------------------------|---|---|---|---------|
| 1. | GEC066002 | E-Commerce | 4 | 0 | 0 | 4 |
| 2. | GEC066005 | Research Problem, Interpretation and Report Writing | 4 | 0 | 0 | 4 |

EVALUATION SCHEME-THEORY

The evaluation of the theory paper of BCA would be based on Internal and External Assessments. Internal Assessment would consist of 50% of the marks (50 marks) and external assessment (in form of End Term Exam) would consist of remaining 50% marks (50 marks). Detailed scheme of Internal and External Assessments as follows:

Internal Assessment

The distribution of Internal Assessment Marks is as follows:

| Туре | Details | Marks |
|------------------------------------------------------------------------------------------|-------------------------------------------------|-------|
| Mid Term | Two Mid-term Sessional of 15 marks each (15+15) | 30 |
| Marks obtained in various Tests, Assignments, Presentations, Quiz, Tutorials, etc. | Average of marks obtained | 15 |
| Attendance | 75%+:5 marks | 5 |
| TOTAL | 50 | |

External Assessment

| Туре | Marks |
|--------|-------|
| Theory | 50 |

EVALUATION SCHEME - PRACTICAL

The evaluation of the practical paper of BCA would be based on Internal and External Assessments. Internal Assessment would consist of 50% of the marks (50 marks) and external assessment (in form of End Term Exam) would consist of remaining 50% marks (50 marks). Detailed scheme of Internal and External Assessment is as follows:

Internal Assessment

| Туре | Details | Marks |
|--------------------------------------------------------------------------------------------------------------------|---------------------------|-------|
| Marks obtained in various manuals, practical file, participation, any model prepared, output of practical | Average of marks obtained | 45 |
| Attendance | 75%+ : 5 marks | 5 |
| TOTAL | 50 | |

External Assessment

| Туре | Marks |
|-----------|-------|
| Practical | 50 |

EVALUATION SCHEME- WORKSHOPS & SEMINARS AND HUMAN VALUES & SOCIAL SERVICE/NCC/NSS

- 1. The evaluation of Workshops & Seminar and Human Values & Social Service/NCC/NSS will be completed from Semester I Semester VI. It will be evaluated internally by the various Forums & Schools Concerned. The credit for this will be given at the end of each Semester.
- 2. The students have to join club/clubs/Forums with the active participation in different activities of club. The students would be continuously assessed from Semester-I to Semester-IV and credits and marks would be given after the end of each Semester

1. Vision

To create an environment where a holistic education is given in order to ignite an inquisitive mind, inculcate the qualities of excellence, perceive the intricacies of research, seek out obstacles, overcome them, and carve out a niche for oneself.

2. Mission

- Enabling students to maximize their potential and use their professional standards through ethics and education to raise their level of competence and become change agents.
- Fostering a scholarly culture that fosters the phenomenon of giving back to society via research and creative endeavours.
- To integrate partnerships that enhance knowledge in order to create a dynamic intellectual capital.
- To employ emerging technology to create an inclusive learning environment that is integrated with an improved educational process.
- To create a teaching-learning atmosphere that fosters resilience, sensitivity, and critical thinking, ultimately leading to the development of a strong personality.

3. Programme Educational Objectives (PEOs)

PEO1: To facilitate in development of basic fundamentals of Computer Applications that fit as a perfect foundation towards a beginning a professional career in industry.

PEO2: To develop programming skills of students by using fundamental knowledge of computer science

PEO3: To apply new designs and solutions to complex real-life problems using technologies.

PEO4: To play a creative role during professional life through turning problems to opportunities.

4. Program Outcome (POs)

- **PO1: Technical understanding:** Solve complicated problems using mathematics, physics, technical foundations, and a specialization in technology.
- **PO2: Problem analysis:** Identify, formulate, analyze research materials, and analyse complex engineering problems using foundational principles of mathematics, natural sciences, and sciences to reach justifiable conclusions.
- **PO3: Application of modern technologies:** Create, select, and apply appropriate approaches, tools, and advanced engineering and IT tools, such as predictions and modelling, to technically challenging processes while taking into account the constraints.
- **PO4:** Expert Principles and Cyber Systems: The ability to use and provide expert principles and cyber systems in a global monetary environment.
- **PO5: Ultimate Education:** Determine the demand for and expand the capacity to work as a Computing certified in permanent education.
- **PO6:** The expert and society: Apply reasoning informed by contextual information to evaluate societal, health, safety, legal, and cultural issues, as well as the obligations that come with them, in the context of professional engineering activity.
- **PO7:** Environmental and sustainable development: Display knowledge of the need for sustainable development by identifying the implications of professional technological solutions in society and the environment contexts.
- **PO8:** Personality and Cooperative Learning: Ability to work as a member or manager in a variety of diverse teams.
- **P09: Ethics:** Adhere to professional ethics, duties, and automotive technology norms by adopting ethical ideas.
- **PO10:** Communication: Interact well with the technical community and society at large on associated technical activities, such as being able to understand and write effective reports and design documentation, give and receive clear directions.
- **PO11: Finance and project management:** Demonstrate knowledge and understanding of technical and professional principles and apply those to one's own work, as a member of the team and leader, to manage projects and in multidisciplinary domains.
- **PO12: Life-long learning:** With socio-technological advancements, students will be able to engage in independent and life-long learning.

5. Program Specific Outcome (PSOs)

PSO1: Prepare for a potentially lucrative and employable profession of computer applications.

PSO2: Continue your education in Computer Science/Applications.

PSO3: Work for yourself in the Indian and worldwide software markets.

PSO4: Comply with all applicable industrial standards.

| | | 6. Course Outcomes |
|-----------------------------|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Course Codes & Course Names | After co | ompletion of these courses' students should be able to |
| BCAC14400 - | CO1: | Understand the drivers and enablers of Industry 4.0 |
| Internet of Things (IOT) | CO2: | Appreciate the smartness in Smart Factories, Smart cities, smart products and smart services. |
| | CO3: | Able to outline the various systems used in a manufacturing plant and their role in an Industry 4.0 world. |
| | CO4: | Appreciate the power of Cloud Computing in a networked economy |
| | CO5: | Understand the opportunities, challenges brought about by Industry 4.0 and how organizations and individuals should prepare to reap the benefits |
| BCAE14008- Cyber Laws | CO1: | Understand the legal frameworks and regulations governing cyberspace |
| | CO2: | Identify and analyse legal issues related to information technology |
| | CO3 : | Evaluate the ethical implications of information technology practices |
| | CO4: | Apply security measures to protect information systems and data. |
| | CO5: | Develop an understanding of the legal rights and responsibilities of individuals and organizations in cyberspace |
| GEC066002- | CO1: | Business Models |
| E-Commerce | CO2: | Identify and analyse Technology Infrastructure |
| | CO3: | Evaluate the ethical implications Security & Privacy |
| | CO4: | Apply Digital Marketing |
| | CO5: | Develop an understanding of Payment & Logistics Integration |
| BCAE14009 - Advance | CO1: | Enables scalable, on-demand computing resources and services over the internet |
| development technologies | CO2: | Mimics human intelligence for decision-making, automation, and predictive analytics |
| | CO3: | Ensures secure, transparent, and decentralized data transactions |
| | CO4: | Apply security measures to protect information systems and data |
| | CO5: | Connects physical devices for real-time data exchange and automation |
| GEC066005- Research | CO1: | Define what constitutes a research problem and identify its significance in the research process. |
| Problem, Interpretation | CO2: | Frame a hypothesis that is testable and aligns with the defined research problem |
| and Report Writing | CO3: | Recognize the limitations of various hypothesis tests and develop strategies to address them |
| | CO4: | Understand and be able to create the appropriate layout for a research report |

| | CO5 : | Write and present a thesis, including text setting, footnotes, conclusions, and suggestions |
|--------------------------------|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| DAPE99449- Academic Project | CO1: | Design and conduct independent research, including formulating research questions, developing hypotheses, and selecting appropriate methodologies. |
| | CO2 : | Develop expertise in data collection, management, and analysis using advanced statistical or qualitative analysis software |
| | CO3: | Develop critical thinking and problem-solving abilities by identifying research gaps, synthesizing information from various sources, and developing innovative solutions or approaches to address research challenges |
| | CO4: | Communicate research findings effectively through written reports and oral presentations |
| | CO5: | Contribute to the chosen field of study by producing research that advances knowledge, addresses significant questions, or solves practical problems |
| BCAE14010 - Intelligent | CO1: | Understand the fundamentals of Intelligent Systems, including AI and expert systems |
| System | CO2: | Implement search techniques for problem-solving in AI. |
| | CO3: | Apply machine learning algorithms for real-world problem-solving. |
| | CO4: | Analyze fuzzy logic and neural network models for decision-making. |
| | CO5: | Evaluate the role of robotics and natural language processing (NLP) in Intelligent Systems. |

7.CO PO Mapping

8.Curriculum

Course Name: Internet of Things

Course Code: BCAC14400

Objectives

After completing this course, students will be able to: Introduce to Terminology, error, fault and failures, design for testability, objectives, principles, Purpose of testing, testing and debugging. Limitations of testing, Role of V&V in Software Evolution, Different types of Testing Techniques and Strategies. Also Discuss Flow graphs and Path Testing, Transaction Flow Testing, Data Flow Testing. Discuss about Software Testing and Regular Expression, Program Mutation Testing, Laboratory Work.

Course Outline

Unit I

IoT Foundations: Introduction to Internet of Things, An Overview Introduction – Definition and characteristics of IoT, Physical design of IoT- Things in IoT, IoT protocol, Logical design of IoT – IoT functional blocks, IoT Communication Models, Introduction to SDN, SDN for IoT, Data Handling and Analytics, Cloud Computing, Sensor-Cloud, Fog Computing, Examples of IoT based Systems: Smart Cities and Smart Homes, Connected Vehicles, Smart Grid, Industrial IoT.

Unit II

IoT Architecture and its Protocols: Basics of Networking, Communication Protocols, Sensor Networks, Machine-to-Machine Communications, Interoperability in IoT, Introduction to Arduino Programming, Integration of Sensors and Actuators with Arduino, Introduction to Python programming, Introduction to Raspberry Pi, Implementation of IoT with Raspberry Pi.

Unit III

Sensors for IoT: Sensing and actuation, types of sensors, Occupancy Sensors, Motion sensor, velocity, temperature, pressure, chemical, Gyroscopic sensor, Optical sensors, Humidity, Water Quality sensors, Sensor applications.

Unit IV

Applications of IoT in Robotics: Future farming with the Internet of things, drones for surveillance, Soft low-power robotics, Tracking sensors for underwater robotics, Disaster response, Medical services, Smart restaurant, Analysis of IoT applications and Sensors, Space robotics for science and space exploration, Satellite based Internetworking, Tele operators, Space component systems like rover mobility, locomotion and guidance

Suggested Readings:

- 1. Lewin A.R.W. Edwards, "Open source robotics and process control cookbook", Elsevier Publications, 2005.
- 2. Francis DaCosta, Rethinking the Internet of Things: A Scalable Approach to Connecting Everything, 1st Edition, Apress Publications, 2013.
- 3. Wimer Hazenberg, Menno Huisman and Sara Cordoba Rubino, Meta Products: Building the Internet of Things, BIS publishers, 2012.
- 4. Pethuru Raj and Anupama C. Raman, The Internet of Things: Enabling Technologies, Platforms, and Use Cases", CRC Press, 2017.
- 5. Arshdeep Bahga and Vijay Madisetti Internet of Things: A Hands-on Approach", Universities Press, 2014.

Course Name: Cyber Laws

Code: BCAE14008

Objectives

• The objective of this course is to provide students with an understanding of cyber laws and their implications in the field of informatics. The course aims to develop students' knowledge of legal frameworks, ethical considerations, and security measures related to information technology.

Course Outline

Unit I

Introduction to Informatics Cyber laws Overview of Cyber laws and their significance, Types of Cybercrimes and legal implications, Jurisdiction and challenges in Cyber law enforcement.

Unit II

Cyber Security and Data Privacy Cyber security threats and countermeasures, Data protection laws and regulations, Cybersecurity policies and practices.

Unit III

Legal Framework for E-commerce and Intellectual Property Laws related to e-commerce and electronic transactions, Intellectual Property laws and their application in the digital environment.

Unit IV

Privacy and Data Protection Laws Privacy laws and regulations, Data breach notification and handling, GDPR and other global data protection laws.

Unit V

Cyber Crime Investigation and Digital Forensics Digital evidence and forensic techniques, Cybercrime investigation process, Role of digital forensics in legal proceedings.

Suggested Readings:

- 1. "Cyber Law: Legal and Practical Considerations for Computer, E-commerce, and Intellectual Property" by Brett J. Trout.
- 2. "Cyberlaw: Management and Entrepreneurship" by Patricia L. Bellia, Paul Schiff Berman, and David G. Post.

Course Name: E-Commerce

Course Code: GEC066002

Objectives

- This course introduces the concepts, vocabulary, and procedures associated with E-Commerce and the Internet. The student gains an overview of all aspects of E-Commerce. Topics include development of the Internet and E-Commerce, options available for doing business on the Internet, features of Web sites and the tools used to build an E-Commerce web site, marketing issues, payment options, security issues, and customer service.
- To enable the student to become familiar with the mechanism for conducting business transactions through electronic means.

Course Outline

Unit I: Introduction

Meaning, concepts, nature, advantages, disadvantages and reasons for transacting online, types of E-Commerce, E-Commerce business models (introduction, key elements of business model and categorizing major E-commerce business models), forces behind e-commerce.

Technology used in E-commerce: The dynamics of world wide web and internet (meaning, evolution and features); Designing, building and launching e-commerce website (A systematic approach involving decisions regarding selection of hardware, software, outsourcing vs. in-house development of a website)

Unit II: Security and Encryption

Need and concepts, the e-commerce security environment: (dimension, definition and scope of e-security), security threats in the E-commerce environment (security intrusions and breaches, attacking methods like hacking, sniffing, cyber-vandalism etc.), technology solutions (Encryption, security channels of communication, protecting networks and protecting servers and clients).

Unit III: IT Act 2000 and Cyber Crimes

IT Act 2000: Definitions, Digital signature, Electronic governance, Attribution, acknowledgement and dispatch of electronic records, Regulation of certifying authorities,

Digital signatures certificates, Duties of subscribers, Penalties and adjudication, Appellate Tribunal, Offences and Cyber-crimes

Unit IV: E-payment System

Models and methods of e-payments (Debit Card, Credit Card, Smart Cards, e-money), digital signatures (procedure, working and legal position), payment gateways, online banking (meaning, concepts, importance, electronic fund transfer, automated clearing house, automated ledger posting), risks involved in e-payments.

Unit V: On-line Business Transactions

Meaning, purpose, advantages and disadvantage of transacting online, E-commerce application in various payment of utility bills, online application in various industries like {banking, insurance, marketing, e-tailing (popularity, benefits, problems and features), online services (financial, travel and career), auctions, online portal, online learning, publishing and entertainment} Online shopping (Amazon, snapdeal, alibaba, flipkart, etc.)

Unit VI: Website designing

Introduction to HTML; tags and attributes: Text Formatting, Fonts, Hypertext Links, Tables, Images, Lists, Forms, Frames, Cascading Style Sheets.

Suggested Readings

- 1. Kenneth C. Laudon and Carlo Guercio Traver, E-Commerce, Pearson Education.
- 2. David Whiteley, E-commerce: Strategy, Technology and Applications, McGraw Hill Education.
- 3. Bharat Bhaskar, Electronic Commerce: Framework, Technology and Application, 4thEd.,McGraw Hill Education.
- 4. PT Joseph, E-Commerce: An Indian Perspective, PHI Learning.
- 5. KK Bajaj and Debjani Nag, E-commerce, McGraw Hill Education.
- 6. TN Chhabra, E-Commerce, Dhanpat Rai & Co.
- 7. Sushila Madan, E-Commerce, Taxmann.
- 8. TN Chhabra, Hem Chand Jain, and Aruna Jain, An Introduction to HTML, Dhanpat Rai & Co.

Course Name: Advance development technologies

Course Code: BCAE14009

Objectives

- To use I/O redirection, pipes, quoting, and filename expansion mechanisms.
- To create structured shell program that accept and use positional parameters and exported variables.
- To use shell flow control and conditional branching constructs while, for, case, if, etc

Course Outline

Unit-I

Internet of Things (IoT) – Definition of IoT, History of IoT, IoT vs. similar concepts, Application/Segment overview, Technology overview

Unit-II

Big Data Analytics: Concepts, examples of big data analytics, benefits of big data analytics, Technologies, and Applications, requirements for being successful with big data analytics

Unit-III

Cloud Computing – Introduction, Why cloud services are popular, advantages, Characteristics, Service models, Deployment of cloud services, Potential privacy risks

Unit-IV

Cyber Security – Introduction, risks, Malicious code, Hacker, attacker or intruder, Cyber security

Principles, Information Security (IS) within Lifecycle Management, Risks & Vulnerabilities, Incident

Response, Future Implications & Evolving Technologies

Unit-V

Wearable Technologies – Introduction, Applications of Wearable Technology, Challenges to Wearable Technology, various Wearable devices.

Reference Books:

- 1. Computer Today, A. Ravichandran, Khanna Publishing House
- 2. Internet of Things, Jeeva Jose, Khanna Publishing House
- 3. Big Data and Hadoop, V.K. Jain, Khanna Publishing House
- 4. Data Sciences and Analytics, V.K. Jain, Khanna Publishing House

Course Name: Research Problem, Interpretation and Report Writing Course Code: GEC066005

Objective:

 The Course based on Waves and Signals and it covers following topics: Basic Knowledge of wireless communications, Elementary Knowledge on Wireless Transmission, Elementary Knowledge on Medium Access Control, Elementary Knowledge on Telecommunications Systems, Mobile Internet, Implementing WAP Services: WML, Implementing WAP (Wireless Application Protocol) Services.

Course Outline

Unit I- Defining the Research Problem

What is a Research Problem? Selecting the Problem, Necessity of Defining the Problem
Technique Involved in Defining a Problem, Framing of Hypothesis

Unit II- Testing of Hypotheses

What is a Hypothesis? Basic Concepts Concerning Testing of Hypotheses, Procedure for Hypothesis Testing, Flow Diagram for Hypothesis Testing, Measuring the Power of a Hypothesis Test, Tests of Hypotheses, Important Parametric Tests, Limitations of the Tests of Hypotheses, Quantitative methods

Unit III- Interpretation

Meaning of Interpretation, Technique of Interpretation, Precaution in Interpretation

Unit IV- Report Writing

Significance of Report Writing, Different Steps in Writing Report, Layout of the Research Report, Types of Reports, Oral Presentation, Mechanics of Writing a Research Report, Precautions for Writing Research Reports, Presentation of Thesis; Preliminaries, The text; Setting of the text, Style of text, The Footnote, Conclusions and Suggestions, Summary, The end matter

Unit V- Computer applications

Introduction, Computer Applications, Computers and Researcher, Digital materials for research, Collection of data from inter net, Concept of Public domain, Use of material available on internet

Unit VI- Style sheet

Style of the Text, Words, spellings, usages, Non-English words, phrases, including Indian words, Punctuation, A full stop (.), A colon (:), A semicolon (;), A comma (,), Quotation marks (``.."), Round brackets (), Square brackets [], Dash (—), Hyphen (-), Conclusion

Course Name: Intelligent System

Course Code: BCAE14010

Unit I

Language Processing: Computational Phonology: Issues, Phonological rules, Mapping text to phones, Prosody in TTS, Probabilistic models of pronunciation and Spelling, N-Grams.

Unit II

Syntax: Word classes and POS tagging, CFG for English, Lexicalized and Probabilistic Parsing. Semantics: Semantic representation, Semantic and Lexical analysis and Word sense disambiguation, IR.

Unit III

Pragmatics: Discourse, Dialogue agents, Natural Language Generation and Machine translation. Machine Learning.

Unit IV

Data Mining: Association rules, Clustering, Decision Trees. Text Mining. Synergetic techniques: Genetic algorithms and ANN techniques for machine learning. Applications to bioinformatics.

Unit V

Intelligent Interfaces: Incorporating Intelligence: Requirements, design issues. Applications Development of Intelligent interfaces for systems - Stand-alone systems like OS, Databases, Physical machines including robots. Web based applications like Tutoring systems, Web

Mining, e-shopping.

Reference Books:

- 1. D. Jurafsky and J. H. Martin, Speech and language Processing, Pearson Education, 2000.
- 2. E. Reiter and R. Dale, Building Natural Language Generation Systems, Cambridge University Press, 2000.
- 3. T. M. Mitchell, Machine learning, McGraw-Hill 1997.
- 4. J. Han and M. Kamber, Data Mining: Concepts and Techniques, Morgan Kaufmann, 2000.

9.Lesson Plans

BCAC14400- Internet of Things

| Unit | Particulars | Class No. | Pedagogy of Class |
|----------|---------------------------------------------------------------------------------|-----------|--------------------------|
| Unit-I | Introduction to IoT, Overview and Characteristics of IoT | C-1 | Lecture |
| Unit-I | Physical Design of IoT – Things in IoT, IoT Protocol | C-2 | Lecture |
| Unit-I | Logical Design of IoT – IoT Functional Blocks, IoT Communication Models | C-3 | Lecture |
