

Detailed Program
Bachelor of Technology (B.Tech.)
Computer Science Engineering (CSE)
&
CSE with Specialization in AI and ML

Semester-IV
(2024-2028)

DOC202406220016

RNB GLOBAL UNIVERSITY
RNB Global City, Ganganagar Road,
Bikaner, Rajasthan 334601

OVERVIEW

RNB Global University follows Semester System. Accordingly, each academic year is divided into two semesters, **Odd (July-December)** and **Even (January-June)**. Besides this, the university follows a system of continuous evaluation along with regular updating in course curricula and teaching pedagogy.

The curriculum for B. Tech (CSE) Program for **(January-June) Even Semester 2026** along with examination pattern is as follows:

Course Scheme

Semester – IV

S. No.	Course Code	Course Category	Course Title	L	T	P	Credits
1	CSEC14250	DSC11	Optimization Techniques	3	0	0	3
2	CSEC14251	DSC-12	Advanced Numerical Techniques Computation Lab (ANTC)	0	0	4	2
3	CSEC14252	DSC-13	Introduction to Machine Learning	3	0	0	3
4	CSEC14253	DSC-14	Software Engineering	3	0	0	3
5	CSEC14254	DSC-15(a)	Computer Networks	3	0	0	3
6	CSEC14255	DSC-15(b)	Computer Networks Lab	0	0	2	1
7	CSEC14256	DSC-16(a)	Python	3	0	0	3
8	CSEC14257	DSC-16(b)	Python Lab	0	0	2	1
9	CSEC14258	DSC-17(a)	Web Technologies	3	0	0	3
10	CSEC14259	DSC-17(b)	Web Technologies Lab	0	0	2	1
11	VAC088029	VAC-2	Basics of Organizational Behavior	2	0	0	2
12	SEC077004	SEC-4	Ability and Skill Enhancement -IV	2	0	0	2
13	WHNN99000		Workshops/ Seminars/Human Values/ Social Service/NCC/NSS	-	-	-	1
Total				22	0	10	28

EVALUATION SCHEME- THEORY

The evaluation of the theory paper of B.Tech would be based on Internal and External Assessments. Internal Assessment would consist of 50% of the marks (50 marks) and external assessment (in form of End Term Exam) would consist of remaining 50% marks (50 marks). Detailed scheme of Internal and External Assessments as follows:

Internal Assessment

The distribution of Internal Assessment Marks is as follows:

Type	Details	Marks
Mid Term	Two Mid-term Sessional of 15 marks each (15+15)	30
Marks obtained in various Tests, Assignments, Presentations, Quiz, Tutorials, etc.	Average of marks obtained	15
Attendance	75%+ : 5 marks	5
TOTAL	50	

External Assessment

Type	Marks
Theory	50

EVALUATION SCHEME -PRACTICAL

The evaluation of the practical paper of B.Tech would be based on Internal and External Assessments. Internal Assessment would consist of 50% of the marks (50 marks) and external assessment (in form of End Term Exam) would consist of remaining 50% marks (50 marks). Detailed scheme of Internal and External Assessment is as follows:

Internal Assessment

Type	Details	Marks
Marks obtained in various manuals, practical file, participation, any model prepared, output of practical	Average of marks obtained	45
Attendance	75%+ : 5 marks	5
TOTAL	50	

External Assessment

Type	Marks
Practical	50

EVALUATION SCHEME- WORKSHOPS & SEMINARS & NCC/NSS

1. NCC/NSS will be completed from Semester I – Semester IV. It will be evaluated internally by the institute. The credit for this will be given at the end of each Semester.
2. The students have to join club/clubs with the active participation in different activities of club. The students would be continuously assessed from Semester-I to Semester-IV and credits and marks would be given after the end of each Semester.

Bachelor of Technology – CSE (Four Years Course)

1. Vision

To deliver a high-quality education that will produce engineers of the highest caliber, equipped with the newest information and cutting-edge concepts in computer science engineering to fulfil the demands of industry and society.

2. Mission

To create an academic setting for the growth of professionals equipped with the knowledge, abilities, values, and self-assurance to assume leadership positions in the field of computer science and engineering.

To promote a culture of research that produces knowledge and cutting-edge technologies that aid in society's sustainable development.

To improve academic collaborations for international exposure.

3. PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

PEO1: To produce students with strong foundation of knowledge and skills in the field of computer science and engineering.

PEO2: To produce students who are employable in private/public sector/research organizations or work as an entrepreneur.

PEO3: To produce students who can provide solutions to problems in their profession by applying computer engineering theory and practices.

PEO4: To produce graduates who can provide leadership and are effective in multidisciplinary environment.

4. PROGRAMME OUTCOMES (POs)

Engineering Graduates will be able to:

P01: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

P02: Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.

P03: Design/Development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

P04: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

P05: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitation.

P06: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

P07: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

P08: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

P09: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

P010: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

P011: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

P012: Life-long learning: Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

5. PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO1: The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics and networking for efficient design of computer-based systems of varying complexity.

PSO2: The ability to employ modern computer languages, environments, and platforms in creating innovative career paths to be an entrepreneur and a zest for higher studies/employability in the field of Computer Science & Engineering.

PSO3: Cultivate the field of computing and its latest trends, to pursue teaching, research & development activities and to work effectively in a team.

6. Course Outcomes		
Course Codes & Course Names	After completion of these courses' students should be able to	
CSEC14250- Optimization Techniques	CO1:	Classify the optimization problems.
	CO2:	Solve optimization problems using linear programming and apply for solving engineering optimization problems
	CO3:	Simplify optimization problems using nonlinear programming (Lagrange multipliers and Kuhn-Tucker conditions) and apply for solving engineering optimization problems
	CO4:	Determine optimization problems using Dynamic programming (CPM, PERT) Methods.
	CO5:	Classify error detection and recovery technique.
CSEC14251- Advanced Numerical Techniques Computation Lab (ANTC)	CO1:	Explain Gauss elimination and Gauss- seidel methods to design linear system.
	CO2:	Develop a function using trapezoidal and Simpson's rule.
	CO3:	Solve the initial value problem using modified Euler's and Runge-kutta methods.
	CO4:	Simplify the Regression analysis using least square principle.
	CO5:	Create a solution of the complex problem using Runge-Kutta Method.
CSEC14252- Introduction to Machine Learning	CO1:	Able to categorize the problems as supervised or unsupervised and to apply regression algorithm for pre-diction problems.
	CO2:	Select and apply supervised algorithms like Naïve bayes algorithm, decision tree and analyze the models using different evaluation parameter.
	CO3:	To build ML models using KNN, SVM classifiers and to perform feature engineering and selection using PCA and LDA.
	CO4:	To Apply different clustering algorithms for the unlabeled data and interpret the results.
	CO5:	Understand the fundamental concepts of deep learning.
CSEC14253- Software Engineering	CO1:	Explain the generic models of software development process.
	CO2:	Illustrate the fundamental concepts of requirements engineering and Analysis Modeling.
	CO3:	Identify the different design techniques and their implementation.
	CO4:	Apply the concepts of life cycle models to choose the appropriate model.
	CO5:	Able to develop the SRS document for project.
CSEC14254- Computer Networks	CO1:	Define various components and categories of data communications, types of connections, topologies, protocols and standards, various transmission media and modems.
	CO2:	Explain various switching techniques used and implement the various

		routing and router protocols,
	CO3:	Illustrate multiplexing and demultiplexing, UDP, TCP protocols and Congestion Control mechanisms.
	CO4:	Identify and correct the errors using various algorithmic techniques, be aware of the various Ethernet standards and bridges.
	CO5:	Choose appropriate protocol for desired communication service
CSEC14255- Computer Networks Lab	CO1:	Demonstrate the client and server concepts in Network system.
	CO2:	Apply Error correction method in data flow.
	CO3:	Categorize the different protocols.
	CO4:	Design the concept of local area networks, their topologies, protocols.
	CO5:	Ability to implement client/server communication
CSEC14256- Python	CO1:	Understand Python syntax and semantics and be fluent in the use of Python flow control and Functions
	CO2:	Develop, run and manipulate Python programs using Core data structures like Lists, Dictionaries, and use of Strings Handling methods.
	CO3:	Develop, run and manipulate Python programs using File Operations and searching pattern using regular expressions.
	CO4:	Interpret the concepts of object oriented programming using Python
	CO5:	Determine the need for scraping websites and working with CSV, JSON and other file formats..
CSEC14257- Python Lab	CO1:	Develop the application specific codes using python.
	CO2:	Understand Strings, Lists, Tuples and Dictionaries in Python.
	CO3:	Understand Functions in Python.
	CO4:	Evaluate programs using modular approach , MRO,Exception Handling.
	CO5:	Construct Digital Systems using Python.
CSEC14258- Web Technologies	CO1:	Explain the basic concepts of Internet programming, Network Security and protocols used.
	CO2:	Build a script using CSS and Java Script.
	CO3:	Create webpages using HTML, HTML5, DHTML.
	CO4:	Develop applications using Web Programming.
	CO5:	Able to contrast server side scripting and Server side programming and develop database connectivity by make use of java and PHP.

CSEC14259- Web Technologies Lab	CO1:	Illustrate scripts using CSS and Java Script.
	CO2:	Build applications using HTML, DHTML.
	CO3:	Develop solution to complex problems using appropriate method, technologies, frameworks, web services and content management.
	CO4:	Design web-based application using suitable client side and server side web technologies.
	CO5:	Able to develop Web applications by using JSP with Database Connectivity
VAC088029- Basics of Organizational Behavior	CO1:	How the organizational behavior can integrate in understanding the motivation (why) behind behavior of people in the organization.
	CO2:	Explain the applicability of the concept of organizational behavior to understand the behavior of people in the organization.
	CO3:	Demonstrate the applicability of analyzing the complexities associated with management of individual behavior in the organization.
	CO4:	Analyze the complexities associated with management of the group behavior in the organization.
	CO5:	Evaluate the behavior of the people based on the different situations.
SEC077004-Ability and Skill Enhancement -IV	CO1:	Design the resume and know about different format.
	CO2:	Know and classify the different types of interviews i.e.Mock Interview, HR Expert Mock Interview, Telephonic Interviews.
	CO3:	Examine the Company Specific Research and Presentation.
	CO4:	Build conversation skill
	CO5:	Find out Industry suitable for internship or job.

7. CO PO Mapping

8. Curriculum

Course Name: Optimization Techniques

Course Code: CSEC14250

Objectives

- The main objective of the course is to formulate mathematical models and to understand solution methods for real life optimal decision problems. The emphasis will be on basic study of linear programming problem, Integer programming problem, Transportation problem, two-person zero sum games with economic applications and project management techniques using PERT and CPM.

Course Outline

Unit I: Scope of Operations Research

Introduction to linear and non-linear programming formulation of different models; **Linear Programming:** Geometry of linear programming, Graphical method, Linear programming (LP) in standard form, Solution of LP by simplex and revised simplex methods, Exceptional cases in LP, Duality theory, Dual Simple method, Sensitivity analysis.

Unit II: Network Analysis

Transportation problem (with transshipment), Assignment problem, Traveling-salesman problem, shortest route problem, Minimal spanning tree, Maximum flow problem; **Integer Programming:** Branch and bound algorithm, Traveling salesman problem.

Unit III: Dynamic programming

Forward recursions, General problem, Reliability problem, Capital budgeting problem, Cargo-loading problem; **CPM and PERT:** Drawing of networks, Removal of redundancy, Network computations, Free slack, Total slack, Crashing, Resource allocation.

UnitIV: Non-Linear Programming

Characteristics, Concepts of convexity, maxima and minima of functions of n-variables using Lagrange multipliers and Kuhn-Tucker conditions, One dimensional search methods, Fibonacci, golden section method and gradient methods for unconstrained problems.

Software: Introduction to software for optimization techniques (TORA).

Suggested Readings:

1. Taha, H.A., Operations Research: An Introduction, Prentice Hall of India (2007) 8th ed.
2. Kasana, H.S., Introductory Operation Research: Theory and Applications, Springer Verlag (2005).
3. Rardin, Ronald L., Optimization in Operations research, Pearson Education (2005).
4. Ravindran A, Phillips D.T. and Solberg J.J. Operation Research: Principles and Practice, John Wiley (2007).

Course Name: Advanced Numerical Techniques Computation Lab (ANTC)
Course Code: CSEC14251

Course Outline

Laboratory Work

Programming exercises on numerical and Statistical methods using C or C++ languages.

1. To detect the interval(s) which contain(s) root of equation $f(x)=0$ and implement bisection Method to find root of $f(x)=0$ in the detected interval.
2. To find the root of $f(x)=0$ using Newton-Raphson and fixed point iteration methods.
3. To evaluate the Newton's Forward Lagrange and divided difference interpolating polynomials of degree $\leq n$, Based on $(n+1)$ points.
4. To solve linear system of equations using Gauss elimination (without pivoting) method.
5. To solve linear system of equations using Gauss- seidel method.
6. To find the dominant eigen-value and associated eigen-vector by Rayleigh power method.
7. To integrate a function numerically using trapezoidal and Simpson's rule.
8. To solve the initial value problem using modified Euler's and Runge-kutta methods.
9. Generation of random numbers for Binomial and Poisson distributions using Linear Congruential Genrator Algorithm.
10. Regression analysis using least square principle.
11. Correlation analysis for bivariate distribution.

Suggested Readings:

1. Conte, S.D and Carl D. Boor, Elementary Numerical Analysis: An Algorithmic approach, Tata McGraw Hill, New York (2005).
2. Johnson, R., Miller, I. and Freunds, J., Miller and Freund's Probability and Statistics for Engineers, Pearson Education(2005) 7th ed.
3. Gerald C.F and Wheatley P.O., Applied Numerical Analysis, Pearson Education (2008) 7th ed.
4. Mathew, J.H., Numerical Methods for Mathematics, Science and Engineering, Prentice Hall Inc.J (2002).
5. Meyer, P.L.. Introductory Probability and Statistical Applications, Oxford (1970) 2nd ed.
6. Jain M.K., Iyengar, S.R.K., and Jain, R.K. Numerical Methods for Scientific and Engineering Computation, New Age International (2008) 5th ed.
7. Walpole, Ronald E., Myers, Raymond H., Myers, Sharon L. and, Keying Ye, Probability and Statistics for Engineers and Scientists, Pearson Education (2007) 8th ed.

Course Name: Introduction to Machine Learning
Course Code: CSEC14252

Objective:

- To introduce students to the basic concepts and techniques of Machine Learning.
- To develop skills of using recent machine learning software for solving practical problems.
- To gain experience of doing independent study and research.

Course Outline:

Unit 1

Introduction to ML, Goals and applications of machine learning. Aspects of developing a learning system: training and testing data. Types of learning: Supervised, Unsupervised, and Reinforcement. Linear regression, variance, bias, gradient descent, R^2 , Ridge and Lasso regression.

Unit 2

Logistic regression, decision boundary, classification parameters: Accuracy, precision, recall, F-measure, RoC curve. Bayesian learning: Probability theory and Bayes rule. Naive Bayes learning algorithm. Regression tree – random forest

Unit 3

Perceptron and backpropagation neural network - k-nearest neighbour rule. Support vector machine: multicategory generalizations, Kernels for learning non-linear functions. ADA Boost classifier. Feature engineering and feature selection. PCA and LDA

Unit 4

Unsupervised learning. Clustering: Learning from unclassified data. Clustering. Hierarchical Agglomerative Clustering. k-means partitional clustering. Expectation maximization (EM) for soft clustering. Semi-supervised learning with EM using labeled and unlabeled data.

Unit 5

Deep learning: Deep Neural network, Activation functions, Cost function, feed forward network, CNN, Sequential Models.

Suggested Readings:

1. Kevin P. Murphy, "Machine Learning, a probabilistic perspective", The MIT Press, 2012.
2. Tom Mitchell, "Machine Learning", McGraw Hill, 1997.
3. Ethem Alpaydin, "Introduction to Machine learning", PHI learning, MIT Press, 2010,

- 2nd edition
4. John D. Killeher, Brian Mac, Namee, AoiFE D'Arcy, Fundamental of Machine Learning for Predictive Data Analytics, 2015 MITpress.
 5. Alex Smola and SVN. Viswanathan, "Introduction to Machine Learning", Cambridge University Press,
 6. 2008.
 7. ShaiShalev-Shwartz and Shai Ben-David, "Understanding Machine Learning: From Theory to Algorithms", Cambridge University Press, 2014.
 8. Ian Goodfellow, Yoshua Bengio, Aaron Courville, "Deep Learning", MIT Press, 2016.

Course Name: Software Engineering

Course Code: CSEC14253

Objectives:

- Planning and Estimation of Software projects
- Software Requirements Specification, Software Design Concepts
- Implementation issues, Validation and Verification Procedures
- Maintenance of Software and methodologies
- To apply principles of software development and evolution. To specify, abstract, verify, validate, plan, develop and manage large software and learn emerging trends in software engineering.

Course Outline:

Unit I: Introduction

Introduction to Software Engineering, importance of Software, The Software Evolution, Software Characteristics, Software Applications, Software Crisis: Problem and Causes
Software Development Life Cycle: Waterfall model, Incremental and Evolutionary process models, Personal Software process (PSP) and Team Software process (TSP), Overview of agile process and aspect oriented programming

Unit II : Software Requirement Specification

Problem Analysis, Requirement elicitation and Validation, Requirements modeling, Scenarios, Information and analysis classes, flow and behavioral modeling, documenting Software Requirement Specification (SRS);

System Design: Design Concepts, design models for architecture, component, data and user interfaces; Problem Partitioning, Abstraction, Cohesiveness, Coupling, Top Down and Bottom Up design approaches; Functional Versus Object Oriented Approach, Design Specification, 4GL.

Unit III: Coding

TOP-DOWN and BOTTOM-UP structure programming, Information Hiding, Programming Style, and Internal Documentation, Verification. **Software Testing:** Levels of Testing,

Functional Testing, Structural Testing, Test Plan, Test Case Specification, Software Testing Strategies, Verification & Validation, Unit, Integration Testing, Top Down and Bottom Up Integration Testing, Alpha & Beta Testing, White box and black box testing techniques, System Testing and Debugging.
Software Quality Assurance: Software Configuration Management, Overview of Software Quality Control and Quality Assurance, ISO 9000 Certification for Software Industry, SEI Capability Maturity Model (CMM) and Comparison between ISO & SEI CMM.

Unit IV: Technical Metrics for Software

A Framework for Technical Software Metrics, Metrics for the Analysis Model, Metrics for Design Model, Metrics for Source Code, Metrics for Testing, Metrics for Maintenance.

CASE (Computer Aided Software Engineering): CASE and its Scope, CASE support in Software Life Cycle, Documentation Support, Architecture of CASE Environment. Exposure to CASE tools like Rational Software suit, Turbo Analyst, SilkSuite.

Suggested Readings:

1. Roger S. Pressman, Software Engineering, A Practitioner's Approach, McGrawHill International Edition (2009) 7th edition.
2. Ian Sommerville, Software Engineering, Addison-Wesley Publishing Company, (2006) 8th ed.
3. Watts Humphery, A discipline for Software Engineering, Addison Wesley, Massachusetts (1995).
4. James F. Peter, Software Engineering - An Engineering Approach, John Wiley (2004).
5. Pankaj Jalote, An integrated Approach to Software Engineering, Narosa (2005).

Course Name: Computer Networks
Course Code: CSEC14254

Objectives

- To develop an understanding of modern network architectures from a design and performance perspective.
- To introduce the student to the major concepts involved in wide-area networks (WANs), local area networks (LANs) and Wireless LANs (WLANs).
- To provide an opportunity to do network programming
- To provide a WLAN measurement idea.
- The subject will introduce the basics of computer networks to students through a study of layered models of computer networks and applications

Course Outline:

Unit I: Introduction

Motivation, OSI model, Signals and media, Bits over signals, Synchronous communication, Modulation and modems, Bandwidth, Throughput, and noise, Time division and Frequency division multiplexing, Standards.

Unit II : Packet Transmission

Multiplexing, Frames, Error correction techniques, LAN/WAN topologies, Shared media and media access, Bus topology, CSMA/CD, Wireless and CSMA/CA, Ethernet addressing and Wiring, hubs.

Unit III:Other LAN technologies

Ring topology, Token passing rings, FDDI, Star topologies, Asynchronous transfer mode, IEEE 802.3, 802.5.

Routing Algorithms: Distance-Vector, Link-State, Shortest path computation, Dijkstra's algorithm, WAN technologies including frame relay, X.25, and ATM.

Unit IV: Internet working

Motivation, Concept, Goals, IP addressing, Address binding with ARP, IP Datagram, Encapsulation IP fragmentation and reassembly, ICMP, TCP, UDP concept and datagrams,

Network Services: Electronic mail, File transfer, Remote login-introduction to protocol specification, Validation and testing.

Suggested Readings:

1. Forouzan, B.A., Data communication and Networking, McGraw Hill (2006) 4th ed.
2. Tanenbaum, A.S., Computer Networks, Prentice Hall (2003) 4th ed.
3. Comer, D.E., Internetworking with TCP/IP Vol. 1 Principles, Portals and Architecture, Prentice Hall of India (2005) 5th ed.
4. Stallings, W., Computer Networking with Internet Protocols and Tech., Prentice Hall of India (2007).

Course Name: Computer Networks Lab

Course Code: CSEC14255

1. Study of different Network cables and practically implement the cross-wired cable and straight through wire using clamping tool.
2. Study Network tools and basic devices
3. Study of Network IP addressing
4. To study about different physical equipment's used for networking.
5. To study different internetworking devices in a computer network
6. Aim: To study the working of Basic Networking Commands
7. To assign IP address to the PC connected to the internet
8. To connect the computers in Local Area Network

Course Name: Python

Course Code: CSEC14256

Course Outline:

Unit-I: Introduction, Python Basics: Entering Expressions into the Interactive Shell, The Integer, Floating-Point, and String Data Types, String Concatenation and Replication, Storing Values in Variables, Your First Program, Dissecting Your Program. Flow control: Boolean Values, Comparison Operators, Boolean Operators, Mixing Boolean and Comparison Operators, Elements of Flow Control, Program Execution, Flow Control Statements, Importing Modules, Ending a Program Early with sys.exit().

Unit-II-Functions: def Statements with Parameters, Return Values and return Statements, The None Value, Keyword Arguments and print(), Local and Global Scope, The global Statement, Exception Handling. 08 L1, L2, L3 Lists: The List Data Type, Working with Lists, Augmented Assignment Operators, Methods.

Unit-III- Dictionaries and Structuring Data: The Dictionary Data Type, Pretty Printing, Using Data Structures to Model Real-World Things. Manipulating Strings - Working with Strings, Useful String Methods.

Unit-IV- Pattern Matching with Regular Expressions: Finding Patterns of Text without Regular Expressions, Finding Patterns of Text with Regular Expressions, More Pattern Matching with Regular Expressions, Greedy and Nongreedy Matching, The findall() Method, Character Classes, Making Your Own Character Classes, The Caret and Dollar Sign Characters, Reading and Writing Files: Files and File Paths, The os.path Module, The File Reading/Writing Process, Saving Variables with the shelve Module, Saving Variables with the pprint.pformat() Function. Organizing Files: The shutil Module, Walking a Directory Tree, Compressing Files with the zipfile Module.

Unit-V- Web Scraping: Project: MAPIT.PY with the web browser Module, Downloading Files from the Web with the requests Module, Saving Downloaded Files to the Hard Drive, HTML.

Suggested Readings

1. Allen B. Downey, "Think Python: How to Think Like a Computer Scientist", 2nd Edition, Green Tea Press, 2015, ISBN: 978-9352134755.
2. Charles Dierbach, "Introduction to Computer Science Using Python", 1st Edition, Wiley India Pvt Ltd. ISBN-13: 978-8126556014.
3. Wesley J Chun, "Core Python Applications Programming", 3rd Edition, Pearson Education India, 2015. ISBN-13: 978-9332555365.

Course Name: Python Lab
Course Code: CSEC14257

Course Outline

Laboratory work

- To install and run the Python interpreter
- To learn control structures.
- To Understand Lists, Dictionaries in python
- To Handle Strings and Files in Python

i) Use a web browser to go to the Python website <http://python.org>. This page contains information about Python and links to Python-related pages, and it gives you the ability to search the Python documentation.

ii) Start the Python interpreter and type `help()` to start the online help utility.

2. Start a Python interpreter and use it as a Calculator.

3. i) Write a program to calculate compound interest when principal, rate and number of periods are given.

ii) Given coordinates (x1, y1), (x2, y2) find the distance between two points

4. Read name, address, email and phone number of a person through keyboard and print the details.

Suggested Readings

1. Python for Data Science, Dr. Mohd. Abdul Hameed, Wiley Publications - 1st Ed. 2021.
2. Python Programming: A Modern Approach, Vamsi Kurama, Pearson
3. Python Programming A Modular Approach with Graphics, Database, Mobile, and Web Applications, Sheetal Taneja, Naveen Kumar, Pearson

Course Name: Web Technologies
Course Code: CSEC14258

Objectives:

- Basic web concept and Internet protocols.
- CGI Concepts & CGI Programming
- SCRIPTING LANGUAGES
- Study of DHTML, XML
- Study of On-Line web application & Internet Concepts

Course Outline:

Unit I: Basics of Internet

Concepts, Architecture: Internet, Intranet and Extranet, Design Goals, Issues and related aspects, addressing schemes, protocols, applications - e-mail, ftp, telnet, WWW, IRC.

Unit II: Intranet Connectivity

Connection concepts, FDDI, ISDN, ADSL, PPP and ATM, Web servers and browser's , web server, proxy server, web browser.

Unit III: Network Security

Network Security attacks and vulnerabilities of Network system, Data Security Encryption, key protocols, Document signatures, firewalls;

Client Side Scripting: Introduction to Javascript and DHTML.

Unit IV: Web Programming

Introduction to Web Pages, HTML, HTTP, SHTTP and XML, Front Page Forms and Form Handlers, Site design and Navigation, Java Programming - class design, inheritance, overloading, polymorphism, exception handling, file streams and their manipulation, servlets, JSP, JDBC,.NET technologies.

Course Name: Web Technologies Lab
Course Code: CSEC14259

Course Outline

Laboratory Work:

- Exploring various web browsers and web servers ,
- Designing web pages in HTML and XML.
- Using Front Page express.
- Programming for web in Java and JSP.

Suggested Readings:

1. Raj Kamal, Internet and Web Technologies , TMH,200
2. Bayross, Web Enable Commercial Application Development Using HTML, DHTML, Javascript, Perl CGI , BPB Publications, 2000.
3. C Xavier , World Wide Web Design, TMH, 2001
4. Monica D'Souza , Web publishing TMH, 2001
5. HeithMorneau , Active Server Pages, Vikas Publishing House,2000
6. Ravi Kalkota, Frontiers of electronic commerce, Addison Wesley, 2000

Course Name: Basics of Organizational Behavior
Course Code: VAC088029

Objectives

- Subject OB prepares students about basic psychology of job. It makes pupil understand about various behavioral aspects when working in an organization at any level.
- To understand the implications of individual and group behaviour in organizational Context. The students will conceptualize the components of individual and group behaviour, understand the practicability of communication and understand the various work, situations and apply behavioural techniques

Course Outline:

Unit I: Introduction to Organizational Behaviour

Today's Organizations, Challenges, Foundations of Organizational Behaviour, Individual Behaviour: Perception, Values, Attitudes Motivation theories. Employees Motivations in Organization, Management by Objectives Learning Processes, Reward and Punishment;

Unit II: Foundations of Group Behaviour

Interpersonal Communication, Leadership, Emotional Intelligence. Power & Politics, Conflict Process, Negotiations, Stress and Coping, Inter-Group Relations, Team Working.

Unit III: A Macro Perspective of Organizational Behaviour

Organization Structure – Key Elements, Types and Basic Models, Work Design, Organizational Change, and Learning Organizations;

Unit IV: Organizational Behaviour

Future Challenges Gender Diversity at the place of work, changing world Scenario, Role of External Environment.

Achieving Competitive: Advantage Management of change, International issues in Organizational Behaviour;

Suggested Readings

1. Robbins, S.P., Organizational Behaviour, PHI (2007) 8th ed.
2. Luthans F., Organizational Behaviour, Irwin Mc-Graw Hill. (2007) 11th ed.
3. Hellriegel, D., and Slocum, J.W., Organizational Behaviour, Southwestern Educational Publishing (2008).

Course Name: Ability & Skill Enhancement – IV

Course Code: SEC077004

Objectives:

- The objectives of the module are to make students self-confident individuals by developing leadership and organizing skills; to guide students in making appropriate and responsible decisions; to give each student a realistic perspective of work related skills and to help students prepare effective interview questions to conduct effective interviews.

Course Outline - Final Assessment – Mock Interviews & PI Kit Submission

Unit I: Tele – Etiquettes

Receiving Calls, Placing a call, Ending Calls, Transferring calls, Taking Message/ Voice Mails, Placing call on hold, Handling Complaints.

Unit II: Confidence Building & Brain Storming

How to build confidence by positive thinking, identifying negative thoughts, how to control negative thoughts entering our mind, identifying personal talents, and its ways to improve, how to develop good habits and having principles and follow them at all times.

Need to learn new things, ideas and skills, what is brain storming, why do we need it, what are the different ways of brain storming through logics and reasoning, Brain Storming Session.

Unit III: PI Kit

What is resume, Format of Resume, Formatting, Resume Preparation, Covering Letter, PI Kit.

Unit IV: Interview Skills

Mastering the art of giving interviews in - selection or placement interviews, web /video conferencing, Mock Interview, HR Expert Mock Interview, Telephonic Interviews;

Unit V: Internship Preparation: Company Specific Research and Presentation

Identifying domain specific industries, researching the industry, Industry analysis, Presentation on specific industry/company.

9. Lesson Plans

CSEC14250– Optimization Techniques

Unit	Particulars	Class No.	Pedagogy of Class
Unit-I	Scope of Operations Research		
Unit-I	Introduction to linear and non-linear programming formulation of different models	C-1	Lecture
Unit-I	Linear Programming: Geometry of linear programming, Graphical method	C-2	Lecture
Unit-I	Linear programming (LP) in standard form, Solution of LP by simplex and revised simplex methods	C-3	Lecture
Unit-I	Exceptional cases in LP, Duality theory	C-4	Lecture
Unit-I	Dual Simple method, Sensitivity analysis	C-5	Lecture
Unit-I	Activity	C-6	Activity
	Take Home Assignments		Home Assignments
	Clarification Class	C-7	Clarification Class
Unit-II	Network Analysis		
Unit-II	Transportation problem (with transshipment)	C-8	Lecture
Unit-II	Assignment problem	C-9	Lecture
Unit-II	Traveling-salesman problem	C-10	Lecture
Unit-II	Shortest route problem	C-11	Lecture
Unit-II	Minimal spanning tree, Maximum flow problem	C-12	Lecture
Unit-II	Integer Programming: Branch and bound algorithm	C-13	Lecture
	Webinar	C-14	Webinar

CSEC14251- Advanced Numerical Techniques Computation Lab (ANTC)

S. No.	Particulars	Class No.	Pedagogy of Class
1	To detect the interval (s) which contain(s) root of equation $f(x)=0$ and implement bisection Method to find root of $f(x)=0$ in the detected interval.	P-1	Lecture
2	Mathematical Programming based on Bisection Method	P-2,3	Practical
3	Mathematical problems solved through Bisection Method: solutions of questions	P-4	Clarification Class
4	Mathematical problems solved through Bisection Method: solutions of questions	P-5	Clarification Class
5	Activity	P-6	Activity
6	Activity	P-7	Activity
7	To find the root of $f(x)=0$ using Newton-Raphson and fixed point iteration methods.	P-8	Lecture
8	Programming on Newton Raphson Method	P-9	Practical
9	Programming on Newton Forward interpolation method	P-10,11	Practical
10	Problems based on Newton forward interpolation	P-12	Clarification Class
11	Finding the root of polynomial using Regula falsi method	P-13	Lecture
12	Programming on Regula Falsi Method	P-14,15	Practical
13	Solution of Simultaneous linear equations using Gauss Elimination Method	P-16	Lecture
14	Programming on Gauss Elimination Method	P-17	Practical
15	Solution of Simultaneous linear equations using Gauss Seidal Method	P-18	Lecture
16	Solution of Simultaneous linear equations using Gauss Seidal Method	P-19	Lecture
17	Programming on Gauss Seidal Method	P-20,21	Practical
18	Numerical Solution of ODE using Euler's method	P-22	Lecture
19	Questions based on numerical solution of ODE and Solution of simultaneous equations using Gauss Seidal Method	P-23	Clarification Class
20	Programming of Euler's method	P-24,25	Practical
21	Numerical solution of ODE using Runge Kutta methods	P-26	Lecture
22	Runge Kutta Method Programming	P-27	Practical
23	Numerical Integration	P-28	Lecture
24	Trapezoidal Rule & Simpson's 1/3 Rule Regression analysis using least square principle. Correlation analysis for bivariate distribution.	P-29,30	Practical

CSEC14252– Introduction to Machine Learning

Unit	Particulars	Class No.	Pedagogy of Class
Unit-I	Introduction to ML		
Unit-I	Introduction to ML, Goals and applications of machine learning, Aspects of developing a learning system: training and testing data	C-1	Lecture
Unit-I	Types of learning: Supervised, Unsupervised, and Reinforcement	C-2	Lecture
Unit-I	Linear regression, Variance, Bias, gradient descent	C-3	Lecture
Unit-I	Bias, gradient descent	C-4	Lecture

	Clarification Class4	C-45	Clarification Class

CSEC14259- Web Technologies Lab

S. No.	Particulars	Class No.	Pedagogy of Class
1	Introduction of HTML, Browser, Online and Offline editor	P-1	Practical
2	Basic tags, text formatting tags	P-2	Practical
3	List and Type Definition Tags, Image and Anchor tags	P-3	Practical
4	Use of tables in HTML	P-4	Practical
5	Use of Frames in HTML	P-5	Practical
6	Introduction of JavaScript, Variables and Type Casting in HTML	P-6	Practical
7	Form in HTML	P-7	Practical
8	Use of DHTML and Use in HTML	P-8	Practical
9	Introduction of CSS, Tags related CSS, Java Script	P-9	Practical
10	Use of XML and How use in WEB Designing	P-10	Practical
11	XML Syntax and Use in HTML Coding	P-11	Practical
12	Clarification Class	P-12	Clarification Class
13	Clarification Class	P-13	Clarification Class
14	Revision	P-14	Clarification Class
15	Revision	P-15	Clarification Class

VAC088029– Basics of Organizational Behavior

Unit	Particulars	Class No.	Pedagogy of Class
Unit-I	Introduction to Organizational Behavior		
Unit-I	Today's Organizations, Challenges	C-1	Lecture
Unit-I	Foundations of Organizational Behavior, Individual Behavior: Perception	C-2	Lecture
Unit-I	Values, Attitudes Motivation theories	C-3	Lecture
Unit-I	Employees Motivations in Organization	C-4	Lecture
Unit-I	Management by Objectives Learning Processes, Reward and Punishment	C-5	Lecture
	Take Home Assignments		Home Assignments
	Clarification Class	C-6	Clarification Class
Unit-II	Foundations of Group Behavior		
Unit-II	Interpersonal Communication	C-7	Lecture
Unit-II	Leadership, Emotional Intelligence	C-8	Lecture
Unit-II	Power & Politics	C-9	Lecture
Unit-II	Conflict Process	C-10	Lecture
Unit-II	Negotiations	C-11	Lecture
Unit-II	Class Room Assignment	C-12	Class Room Assignment
Unit-II	Stress and Coping	C-13	Lecture
Unit-II	Inter-Group Relations, Team Working	C-14	Lecture
	Presentation	C-15	Presentation
	Clarification Class	C-16	Clarification Class
Unit-III	A Macro Perspective of Organizational Behavior		
Unit-III	Organization Structure – Key Elements	C-17	Lecture
Unit-III	Quiz	C-18	Quiz
	Take Home Assignments		Home Assignments
	Class Room Assignment	C-19	Class Assignment
	Activity	C-20	Activity
Unit-III	Types and Basic Models	C-21	Lecture
Unit-III	Work Design	C-22	Lecture
Unit-III	Organizational Change, and Learning Organizations	C-23	Lecture
	Clarification Class	C-24	Clarification Class
Unit-IV	Organizational Behavior		
Unit-IV	Future Challenges Gender Diversity at the place of work	C-25	Lecture
	Presentation	C-26	Presentation
	Class Room Assignment	C-27	Class Assignment
	Take Home Assignments		Home Assignments
Unit-IV	Changing world Scenario, Role of External Environment	C-28	Lecture
Unit-IV	Advantage Management of change, International issues in Organizational Behavior	C-29	Lecture
	Clarification Class	C-30	Clarification Class

SEC077004– Ability and Skill Enhancement -IV

Unit	Particulars	Class No.	Pedagogy of Class
Unit-I	Receiving Calls, Placing a call, Ending Calls	C-1	Lecture
Unit-I	Transferring calls, Taking Message/ Voice Mails, Placing call on hold	C-2	Lecture
Unit-I	Handling Complaints	C-3	Lecture
	Telephonic Conversation	C-4	Class Assignment
Unit-II	How to build confidence by positive thinking,	C-5	Lecture
Unit-II	identifying negative thoughts, how to control negative thoughts entering our mind, identifying personal talents, and its ways to improve	C-6	Lecture
Unit-II	how to develop good habits and having principles and follow them at all times	C-7	Lecture
Unit-II	Need to learn new things, ideas and skills	C-8	Lecture
Unit-II	what is brain storming, why do we need it,	C-9	Lecture
Unit-II	what are the different ways of brain storming through logics and reasoning	C-10	Lecture
Unit-II	Brain Storming Session - Assignment	C-11	Activity
	Presentation	C-12	Presentation
Unit-III	What is resume	C-13	Lecture
Unit-III	Format of Resume, Formatting	C-14	Lecture
Unit-III	Resume Preparation		Home Assignments
Unit-III	Covering Letter, PI Kit	C-15	Lecture
Unit-IV	Mastering the art of giving interviews in	C-16	Lecture
Unit-IV	selection or placement interviews	C-17	Lecture
Unit-IV	web /video conferencing	C-18	Activity
Unit-IV	Mock Interview (Questions)	C-19	Lecture
Unit-IV	Mock Interview (Questions)	C-20	Lecture
Unit-IV	HR Expert Mock Interview	C-21	Class Assignment
Unit-IV	Telephonic Interviews	C-22	Activity
Unit-IV	Class Room Assignment	C-23	Class Assignment
Unit-V	Identifying domain specific industries	C-24	Lecture
Unit-V	Identifying domain specific industries - Assignment	C-25	Activity
Unit-V	researching the industry		Home Assignments
Unit-V	Industry analysis	C-26	Lecture
Unit-V	Presentation on specific industry/company	C-27	Presentation
	Webinar	C-28	Webinar
	Guest Lecture	C-29	Guest lecture
	Home Assignment		Home Assignments
	Clarification Class	C-30	Clarification Class

CSEC14256- Python

Unit	Particulars	Class No.	Pedagogy of Class
Unit-I	Entering Expressions into the Interactive Shell, The Integer, Floating-Point, and String Data Types	C-1	Lecture
Unit-I	String Concatenation and Replication, Storing Values in Variables	C-2	Lecture
Unit-I	Your First Program, Dissecting Your Program	C-3	Lecture
Unit-I	Flow control: Boolean Values, Comparison Operators	C-4	Lecture
Unit-I	Boolean Operators, Mixing Boolean and Comparison Operators	C-5	Lecture
Unit-I	Elements of Flow Control, Program Execution	C-6	Lecture
Unit-I	Elements of Flow Control, Program Execution	C-7	Lecture
Unit-I	Flow Control Statements	C-8	Lecture
Unit-I	Flow Control Statements	C-9	Lecture
Unit-I	Flow Control Statements	C-10	Lecture
Unit-I	Importing Modules	C-11	Lecture
Unit-I	Ending a Program Early with sys.exit()	C-12	Lecture
Unit-I	Ending a Program Early with sys.exit()	C-13	Lecture
Unit-I	Clarification Class	C-14	Clarification Class
Unit-I	Class Room Assignment-1	C-15	Class Assignment
	Home Assignment-1		Home Assignments
Unit-II	Functions: def Statements with Parameters, Return Values and return Statements		
Unit-II	The None Value, Keyword Arguments and print()	C-16	Lecture
Unit-II	Local and Global Scope, The global Statement	C-17	Lecture
Unit-II	Exception Handling. 08 L1, L2, L3 Lists: The List Data Type	C-18	Lecture
Unit-II	Exception Handling. 08 L1, L2, L3 Lists: The List Data Type	C-19	Lecture
Unit-II	Working with Lists	C-20	Lecture
Unit-II	Augmented Assignment Operators	C-21	Lecture
Unit-II	Augmented Assignment Operators	C-22	Lecture
	Class Room Assignment-2	C-23	Class Assignment
	Home Assignment-2		Home Assignments
Unit-II	Methods	C-24	Lecture
Unit-II	Clarification Class2	C-25	Clarification Class
	Presentation 1	C-26	Presentation
Unit-III	Dictionaries and Structuring Data: The Dictionary Data Type		
Unit-III	Pretty Printing	C-27	Lecture

Unit-III	Using Data Structures to Model Real-World Things	C-28	Lecture
Unit-III	Using Data Structures to Model Real-World Things	C-29	Lecture
Unit-III	Manipulating Strings - Working with Strings	C-30	Lecture
Unit-III	Manipulating Strings - Working with Strings	C-31	Lecture
Unit-III	Useful String Methods	C-32	Lecture
Unit-III	Useful String Methods	C-33	Lecture
Unit-III	Clarification Class3	C-34	Clarification Class
	Class Room Assignment-3	C-35	Class Assignment
	Home Assignment 3		Home Assignments
	Presentation 2	C-36	Presentation
Unit-IV	Pattern Matching with Regular Expressions:		
Unit-IV	Finding Patterns of Text without Regular Expressions, Finding Patterns of Text with Regular Expressions, More Pattern Matching with Regular Expressions	C-37	Lecture
Unit-IV	Greedy and Nongreedy Matching, The findall() Method, Character Classes, Making Your Own Character Classes, The Caret and Dollar Sign Characters, Reading and Writing Files: Files and File Paths, The os.path Module	C-38	Lecture
Unit-IV	The File Reading/Writing Process, Saving Variables with the shelve Module, Saving Variables with the pprint.pformat() Function. Organizing Files: The shutil Module, Walking a Directory Tree, Compressing Files with the zipfile Module.	C-39	Lecture
Unit-V	Web Scraping: Project: MAPIT.PY with the web browser Module	C-40	Lecture
Unit-V	Downloading Files from the Web with the requests Module	C-41	Lecture
Unit-V	Downloading Files from the Web with the requests Module	C-42	Lecture
Unit-V	Saving Downloaded Files to the Hard Drive, HTML.	C-43	Lecture
Unit-V	Quiz	C-44	Quiz
	Clarification Class4	C-45	Clarification Class

CSEC14257- Python Lab

S. No.	Particulars	Class No.	Pedagogy of Class
1	Use a web browser to go to the Python website http://python.org . This page contains information about Python and links to Python-related pages, and it gives you the ability to search the Python documentation	P-1	Practical
2	Start the Python interpreter and type help() to start the online help utility	P-2	Practical
3	Start the Python interpreter and type help() to start the online help utility	P-3	Practical
4	Start the Python interpreter and type help() to start the online help utility	P-4	Practical
5	Write a program to calculate compound interest when principal, rate and number of periods are given.	P-5	Practical
6	Given coordinates (x1, y1), (x2, y2) find the distance between two points	P-6	Practical
7	Read name, address, email and phone number of a person through keyboard and print the details	P-7	Practical
8	a) Demonstrate about Basics of Python Programming. b) Demonstrate about fundamental Data types in Python Programming. (i.e., int, float, complex, bool and string types) c) Demonstrate the working of following functions in Python. i) id() ii) type() iii) range() d) Write a Python program to demonstrate various base conversion functions. e) Write a Python program to demonstrate various type conversion functions.	P-8	Practical
9	a) Demonstrate the following Operators in Python with suitable examples. i) Arithmetic Operators ii) Relational Operators iii) Assignment Operator iv) Logical Operators v) Bit wise Operators vi) Ternary Operator vii) Membership Operators viii) Identity Operators	P-9	Practical
10	3 a) Write Python programs to demonstrate the following: i) input() ii) print() iii) 'sep' attribute iv) 'end' attribute v) replacement Operator ({ }) b) Demonstrate the following Conditional	P-10	Practical

	statements in Python with suitable examples. i) if statement ii) if else statement iii) if – elif – else statement		
11	a) Write a Python program to demonstrate various ways of accessing the string. i) By using Indexing (Both Positive and Negative) ii) By using Slice Operator	P-11	Practical
12	a) Python program to perform read and write operations on a file. b) Python program to copy the contents of a file to another file. c) Python program to count frequency of characters in a given file. d) Python program to print each line of a file in reverse order. e) Python program to compute the number of characters, words and lines in a file.	P-12	Clarification Class
13	Revision	P-13	Clarification Class
14	Revision	P-14	Clarification Class
15	Revision	P-15	Clarification Class

Note: The review of Syllabus happens on a periodic basis for the benefit of the students. In case there are changes in curriculum due to review, students would be intimated in writing.
